## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to an isolated nucleic acid having endosperm specific gene expression promoter activity.

Group II, claim(s) 17-26 and 28-30 drawn to an isolated nucleic acid encoding a BETL protein, plants and cells transformed therewith and methods thereof.

Group III, claim(s) 27, drawn to an isolated BETL protein comprising the amino acid sequence of SEQ ID NO: 54.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: because the special technical feature of an isolated polynucleotide sequence that comprises a sequence that is conserved among the promoter sequences of the invention that have endosperm specific activity (see claim 1) was taught in the art. Sevilla-Lecoq teach the AE box, an 18 bp sequence present in the ZmA3 promoter and other endosperm specific promoters (see abstract and page 4 figure 1 and in column 1 the first full paragraph), and thus there is no special technical feature.

Upon election of either Group I or II, Applicant is further required to elect one promoter sequence of either SEQ ID NO: 1, 2, 3 or 62; or one coding sequence of 6, 8, 10, 12, 14, 16, or 53 and one of the respective amino acid sequences of SEQ ID NO: 5, 7, 9, 11, 13, 15 or 58. This requirement is not to be construed as a requirement for an election of species, since each of the nucleic acid sequences or amino acid sequences recited in alternative form is not a member of a single structurally and functionally related genus, but rather constitutes an independent and

Art Unit: 1638

patentably distinct invention. Separate searches and considerations would be required for examination of each of the nucleic acid sequences.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
